PROJECTS

Check Live Train Schedule This Python program allows users to enter a train number and retrieves its schedule details. It displays the train's departure and arrival times along with station names. This helps users quickly find information about specific trains. The program ensures accurate and efficient timetable tracking. It can be enhanced with real-time updates or additional train details. This system is useful for passengers.

Online Courses Sales Startup Data Analysis using PowerBI This project focuses on analyzing Online courses sales data to uncover insights into recorded lectures, emphasizing category-wise trends. Key objectives include understanding course distribution across categories, identifying popular skills, analyzing language preferences, evaluating subtitle impact on engagement, highlighting top instructors, and exploring the relationship between course duration, skill variety, and viewership. The findings aim to help the startup strategically expand its offerings and align content with learner demand.
